

ARIKO ANDIKABINA

Director of Rating Development & Digitalization

Ariko Andikabina is an architect, educator, and sustainability advocate with a strong background in architectural design and professional development. He co-founded and currently leads Sustainable **Office** and **SAI.ars**, where he focuses on integrating sustainable design principles into architecture and urban planning.

As a **core founder of Green Building Council Indonesia,** Ariko plays an active role in advancing sustainable practices in the built environment. He also serves as a **certification assessor**, contributing to the evaluation and verification of green building projects in Indonesia. His leadership extends to the **Indonesian Architects Association (IAI) Jakarta,** where he has held the position of **Secretary General.**

Beyond his professional practice, Ariko is a **full-time lecturer at Universitas Indonesia**, where he shares his expertise in architecture and sustainability with the next generation of professionals.

His academic journey began at **Universitas Muhammadiyah Jakarta, where he earned a degree in architecture.** He later participated in the **Global Studio UN MDG Taskforce in Istanbul, Turkey.**

Ariko's contributions to architecture have earned him recognition, including **second place in the Universitas Terbuka Semarang design competition (2024)** and **finalist status in the Mentawai Government Center competition (2023)**. His early involvement in student organizations, including leading the **Fathirista** Architecture Student Association and the Student Representative Council at FTUMJ, reflects his long-standing commitment to leadership and collaboration in the industry.
