

DIRECTOR OF RATING DEVELOPMENT & DIGITALIZATION

ARIKO ANDIKABINA

Ariko Andikabina is an architect, educator, and sustainability advocate with a strong background in architectural design and professional development. He co-founded and currently leads **Sustainable Office** and **SAI.ars**, where he focuses on integrating sustainable design principles into architecture and urban planning.

As a core founder of Green Building Council Indonesia, Ariko plays an active role in advancing sustainable practices in the built environment. He also serves as a certification assessor, contributing to the evaluation and verification of green building projects in Indonesia. His leadership extends to the Indonesian Architects Association (IAI) Jakarta, where he has held the position of Secretary General.

Beyond his professional practice, Ariko is a full-time lecturer at Universitas Indonesia, where he shares his expertise in architecture and sustainability with the next generation of professionals.

His academic journey began at Universitas Muhammadiyah Jakarta, where he earned a degree in architecture. He later participated in the Global Studio UN MDG Taskforce in Istanbul, Turkey.

Ariko's contributions to architecture have earned him recognition, including second place in the Universitas Terbuka Semarang design competition (2024) and finalist status in the Mentawai Government Center competition (2023). His early involvement in student organizations, including leading the **Fathirista** Architecture Student Association and the Student Representative Council at FTUMJ, reflects his long-standing commitment to leadership and collaboration in the industry.
